Amadeus e-Travel Management at a glance

...and, as always, Business-critical reliability and Service excellence.

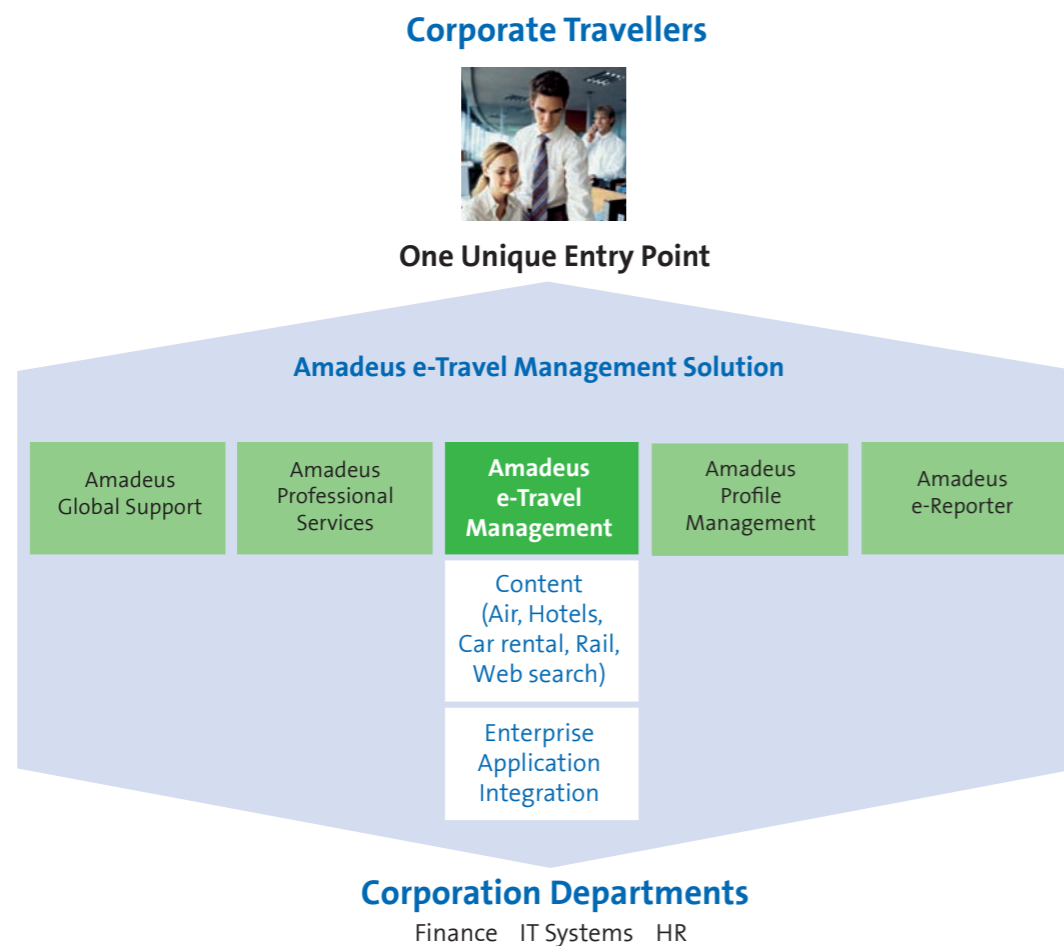

Amadeus e-Travel Management Solution

Optimising your IT environment & supporting your business goals

Your business has been evolving from the day it was founded. But evolution generally is speeding up - more and more. Clearly, getting up to speed on new technology and management applications is critical. That's where Amadeus comes in. Amadeus professionals make sure that you have the travel IT project that's perfect for you. Amadeus means much more than just the best IT solutions – it stands for professional services & global support.

A simple & efficient travel management solution for your travel processes

Amadeus e-Travel Management removes the complexities from making travel arrangements so your employees can concentrate on what matters most – your business. With Amadeus e-Travel Management, planning, booking and purchasing complete travel itineraries (while adhering to your company's guidelines) becomes simple. Corporations and travel agencies alike can integrate all elements of their global travel programmes (including travel policies, preferred suppliers and negotiated rates) into one easy-to-use website.

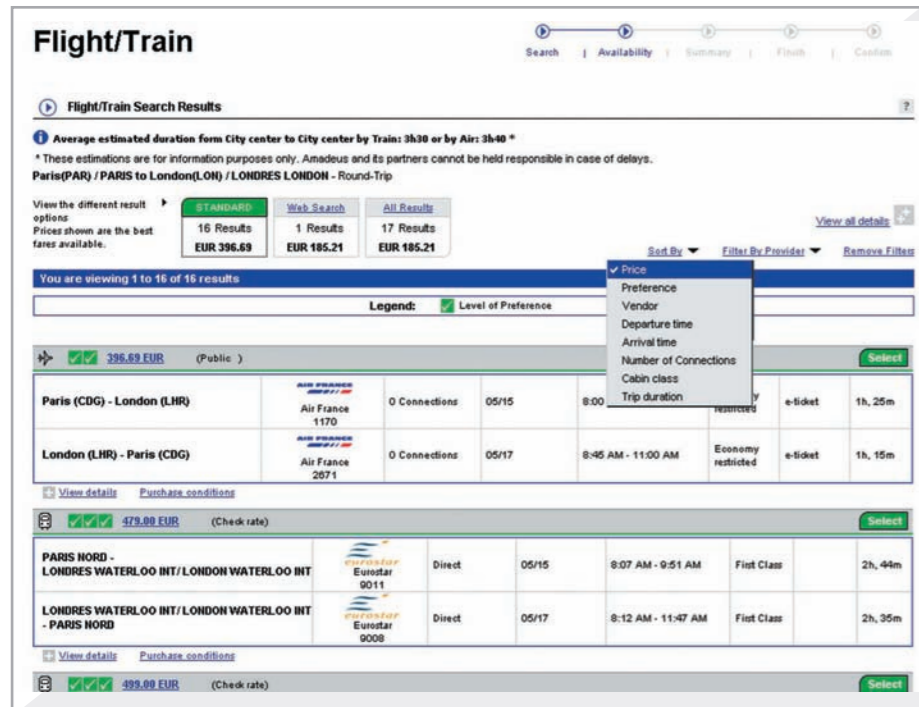

Simple and intuitive interface

Empower your travellers and take the effort out of booking travel

Amadeus e-Travel Management makes arranging travel effortless. One of the secrets is the **user-friendly, intuitive interface**. Instead of wasting time with complicated systems, your employees can spend more time focusing on their jobs – in other words, your business. With a **single entry point** accessible via the web, automated reservations and Amadeus e-Travel Management’s **easy-to-use platform**, employees simply open a browser, log in, and make travel plans from anywhere, any time. They can compare and select the best

option **with just a few clicks**. Content from different sources is aggregated into a single display – the traveller only has to **look at one page** to view all possible travel options.

This host of advantages together with smooth approval processes, highly localised functionalities, content that answers your traveller’s needs, as well as effective training and implementation programmes deliver the industry’s highest adoption rates - fast.

Content relevant to your business needs gives your travellers the edge

Simplify your travellers access to relevant content

It’s a big world - and Amadeus e-Travel Management gives **automatic access to the world’s largest and most widely used content databases**. You’ll also have **direct access to major providers**, for example low-cost carriers, hotels, rail, car rental companies, while **multiple faring options** incorporate public, corporate negotiated, agency and low-cost carriers’ web-only fares into your travel management solution.

To date Amadeus e-Travel Management is available in over 13 languages and supports over 160 currencies, but we always remain one step ahead and keep adding more and more relevant content to answer your global and local needs.

Your travellers want to know what they find when they get there? **Very useful traveller information**, for example visa and customs as well as weather info, maps for public transport systems, hotel pictures and much more simplifies getting and being there.

Amadeus e-Travel Management is a global solution providing you with outstanding answers to your local needs.

13	<input checked="" type="checkbox"/>	 Classic Inn Hotels	Lowest fares includes the following rate plan(s) Weekend	1.9 Kilometers - West / Linousine service	60.00 GBP 86.45 EUR

18	<input checked="" type="checkbox"/>	 Thistle Kensington Gardens	Includes the following rate plan(s) Weekend	4.0 Kilometers - West / Taxi	64.20 GBP 92.50 EUR

Optimise your IT investments with best-in-class systems integration

Amadeus e-Travel Management connects smoothly with your existing IT systems

Leverage your corporate IT infrastructure investment: Amadeus assists with the integration of the online travel solution into your existing corporate IT environment and applications (such as travel expense, HR and workflow systems as well as corporate intranets and travel agency back-office

systems). Benefit from our open integration interfaces for portal, single sign-on, approval workflow, expense management, data warehouse, and connect smoothly to existing IT systems, such as SAP and ORACLE, or your in-house systems.

Benefit from a flexible and customisable platform

Fast and easy administration gives you control over your travel management

Other features

Community concept: whether your travel programme involves one department, twenty worldwide offices or any mix of subsidiaries and TMCs, Amadeus e-Travel Management lets you manage the travel process in one easy-to-use website. Communities enable you to use one central travel site to quickly assign specific policies to groups of employees, departments or worldwide business units. Similarly, travel agencies leverage communities to apply different policies to different corporate clients.

Pilot site administration lets you make and test changes without fuss – for example adding a new airline contract in real time. This eliminates the need for “site reloads” and lets you post policy changes and updates for any number of user groups.

Administration made easy: follow changes immediately – in real time. “Clone” communities enable rapid roll-out while minimising administrative tasks; rules wizards make applying policies quick and easy.

Amadeus e-Travel Management offers **immediate site set up** and real-time configuration as well as **simple and fast deployment** thanks to the community and Pilot site concepts.

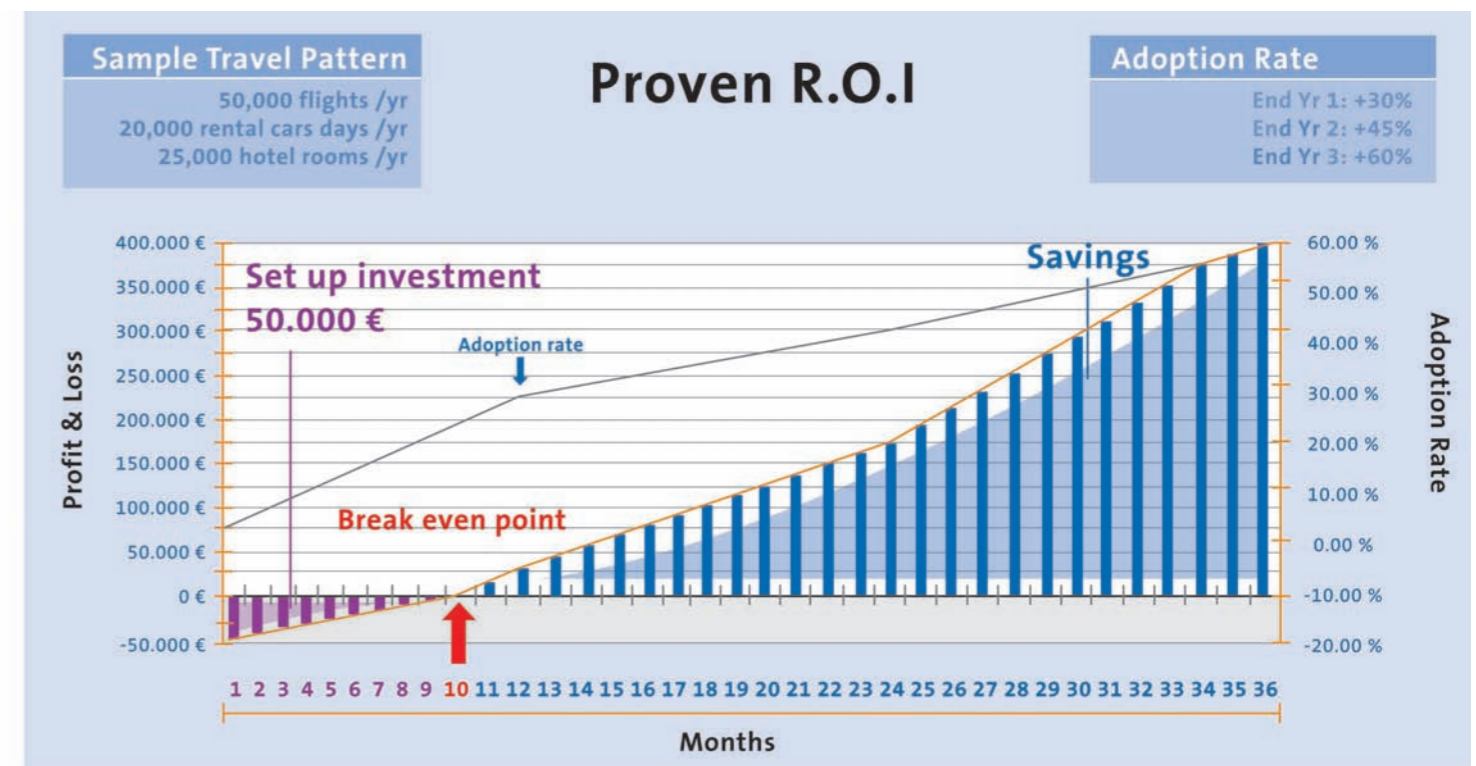

Single access for global administration gives you control over all your sites and helps enforce adoption of travel policies. However, control can be delegated to local or sub-entities. **Integrated comprehensive workflow approval** is tailored to your global and local requirements.

Amadeus e-Travel Management is fully supported by the leading travel management companies (TMCs), all trained to support your travellers and equipped to implement and fulfil on Amadeus e-Travel Management.

Nothing can beat experience: Amadeus gives you business-critical reliability

Did you know that?

- > Amadeus e-commerce platform handles 1.5 million bookings per month.
- > Amadeus runs the 4th largest e-commerce platform in the world by gross sales.
- > Amadeus powers over 70 of the leading worldwide airline and agency websites.
- > Amadeus e-Travel Management has been chosen by over 1,000 of the world’s largest corporations.
- > Amadeus’ data centre in Germany is one of world’s largest in private hands.

Amadeus' true value lies in the combination of technology and partnership.

Amadeus gives you more

Our global coverage and local expertise make us unique. Amadeus solutions give you tremendous flexibility to respond to international opportunities whilst allowing you to pay greater attention to local issues.

While you know exactly which direction your business has to take, we can make sure you use the best technology and reap the benefits immediately.

You want tomorrow's travel technology today, you want it to work in your favour, and you need to remain in control.

Amadeus e-Travel Management provides you with cutting-edge technology and adaptable solutions and services:

- > **a global platform** and a powerful administration module for low cost of ownership and administration
- > **an intuitive user interface** and ample, relevant content guarantee a high adoption rate
- > **powerful reporting capability:** monitor your business, highlight critical information and save costs
- > **made-easy profile management:** update your data accurately, save time, reduce costs.

Can there be even more than cutting-edge technology?

Yes! Invite an Amadeus professional to work alongside you and experience the Amadeus formula: technological solutions & services that add up to a world of opportunities. Our Consulting & Services portfolio provides you with customised professional services and global support.

Cybertrust (formerly TruSecure) is one of the world's largest providers of information security and is identified as global market leader in managed security services. Amadeus e-Travel Management's hosting environment has achieved excellence through the Cybertrust Perimeter Certification Program as it operates to an optimum level of security.
