

Amadeus Hotels Plus brings significant web benefits to travel agents' hotel sales. Easy to use and quick to book, Amadeus Hotels Plus improves efficiency and adds value to the customer offer.

Amadeus Hotels Plus

Selling more hotels on the GDS is now as fun as on the web!

Easy to use

Integrated with Amadeus Selling Platform, Amadeus Hotels Plus is the first GDS hotel-selling tool designed as a website, thus offering you the same intuitive navigation. The guided mode is enhanced with tool tips given when passing over icons with your mouse and with a status bar indicating your position in the sales process.

Amadeus Hotels Plus requires no cryptic or IATA codes knowledge. You can search for IATA and non-IATA cities using non-cryptic language.

Thanks to the Autocompletion, you find locations more easily: just fill in the first three letters and the tool suggests the most logical ending. This avoids typos and other mistakes caused by incorrect localization of a city.

With Amadeus Hotels Plus, you spend less time learning to use the tool and more time dedicated to your customer's demands.

Book in just 5 clicks

Amadeus Hotels Plus enables you to work more efficiently by accessing accurate information straight away.

The comprehensive searching and booking flow enables you to book in just 5 clicks!

Personalised search results based only on the customer's criteria and real-time hotel availability are displayed.

You can also retrieve your search history easily and bookmark your 10 favourite hotels, thus being even more efficient.

Additionally, if an air segment is in PNR, City and Dates information will be pre-filled.

Shop from the map

Easy to handle without specific training, Amadeus Hotels Plus offers unprecedented features for the GDS such as the possibility to choose from a detailed list with photos and descriptive text, or directly from a location on a map with a choice of three views (map, satellite, and bird's eye view).

Not only does Amadeus Hotels Plus provide access to more than 78,000 properties, it focuses on the customer's expectations for delivery of the adapted offer. Search and sell the best available rate (BAR programme), choose a hotel depending on the requested presence of specific amenities and recommend the most attractive and competitive offer to each customer with confidence.

Displaying exhaustive information on the hotel identity card adds detail and value to your offer. Moreover, you can share all that information with your customer: compare up to 5 hotels and email the result directly from Hotels Plus.

Amadeus Hotels Plus enables you to make more bookings that best suit your customers!

It is interactive, which diversifies services, and helps us up-sell as well, by offering customers not just air bookings but hotels.

Tesa de Guzman
General Manager,
Rajah Travel Corporation (Makati)

Booking hotels through the cryptic version of Amadeus Hotels is good, but now it is even better with the graphic Hotels Plus: we are able to locate the hotel and its environment... and choose directly on the map. We can show hotel pictures to our customers at once, giving them also different sights- such as a bird's eye view- and that makes selling more interactive.
