

# Amadeus Corporate Insight Travel & Expense

amadeus

Powering smarter business travel  
through business intelligence

Your company's investment in Business Travel needs to bring growth, efficiency and employee productivity.

With Amadeus Corporate Insight we help our customers maximise the return on their Business Travel spend, enabling them to better control costs and negotiate with confidence. Being able to rely on a single source of data with up-to-date information will empower you to take confident, timely decisions.

## Business travel gets smarter for your corporation...

### 1. Analyse your company travel spend answering all your key questions

- Am I managing travel within budget?
- Are negotiated rates booked? Can I improve or reinforce my travel program for some destinations or for specific divisions in my company?
- Which suppliers am I spending the most with?
- What is my online booking ratio? How can it be improved? What is the average fare difference between online and offline bookings?
- On which destinations and / or with which suppliers can I find missed opportunities for saving money?
- On which routes could my company save money if travel was booked further in advance?

### 2. Using a fast, easy-to-use tool on your desktop, tablet or mobile phone

Answering all your T&E related questions is made really easy thanks to an advanced and intuitive user interface.

Its fully responsive design enables visualization not only on desktop but also across all mobile devices.

The tool allows you to change filters and drill down to analyse data quickly.

Data behind some charts can be exported for further processing or including in your reports and presentations, for instance as an Excel file or PowerPoint.

### 3. With pre-defined dashboards and easy to customise for further analysis

Over 35 pre-defined dashboards cover the most recurrent concerns of travel managers and budget controllers.

In addition, you may customise the content of these dashboards, save them and even build your own dashboards:

- Drill down on any chart by selecting a specific (or several) dimension(s). Other charts automatically adjust.
- Apply filters to any report. For instance, details by organisational structure as well as by projects are available on all reports
- You can save changes to existing dashboards or create your own, as well as custom charts and "visual stories", using the wide range of dimensions and measures available.

“ Without **the right data**, we don't get the most out of our travel buying”

**Chief Procurement Officer, US Corporate**

## Missed savings

## Adoption of Corporate Programme

With the technology that keeps the travel industry moving

### A powerful data model

A powerful data model is at the core of Amadeus Corporate Insight Travel & Expense, leveraging Amadeus expertise in travel, business intelligence and reporting.

It relies on an exhaustive (booking and expense) and up-to-date set of data, which is refreshed on a daily basis.

Past data is included with a 2-year history.

### Able to integrate data from other sources

In addition to data from Amadeus cytric Travel and Expense, your own data set (e.g. budget, forecasts) can also be integrated so that you can, for instance, monitor evolution of your travel spend against budget directly in the tool.

Amadeus Corporate Insight is also able to capture data from other expense management systems or credit card feeds.

### Built on a robust infrastructure

Amadeus Corporate Insight benefits from Amadeus expertise in travel intelligence solutions, products and services.

It relies on the latest business intelligence technologies and on a flexible, secure and scalable platform to deliver innovative insights for the travel industry.
