# Amadeus e-Travel Management & Mobile Technology

Providing the **Total Trip Experience** for corporate travellers, with technology solutions that span before, during and after all travel steps.

Including mobile technology solutions to help corporations take care of their travellers while on the move.

# Mobile services for Corporations

- ▶ Today, travellers with iPhones can make their **travel arrangements** through Amadeus e-Travel Management while on the move as they would at their office desk
- ▶ They can also read their confirmation email on a wireless handheld device and **synchronise their calendars with the Online Booking Tool**, to help them keep track of planned trips
- ▶ Amadeus e-Travel Management also avoids bottlenecks by allowing **approvers to either confirm or reject trips while on the go via a Blackberry device**. There is no need to log into Amadeus e-Travel Management to view the list of trips pending approval. Approvers receive an email directly into their handheld device which they will be able to quickly dispatch.

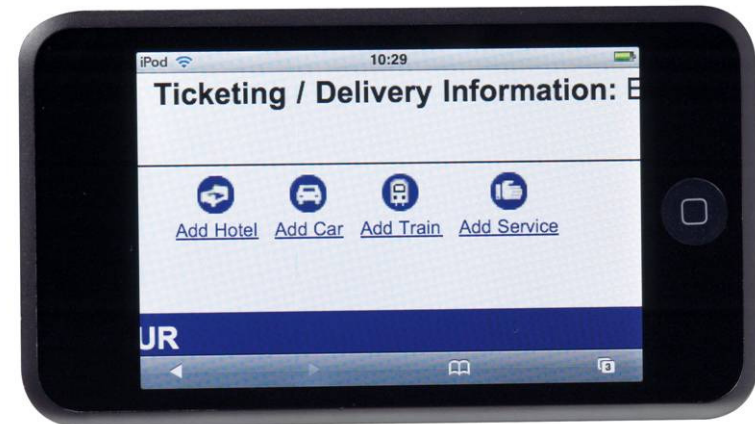

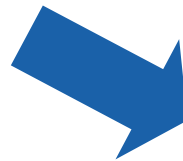

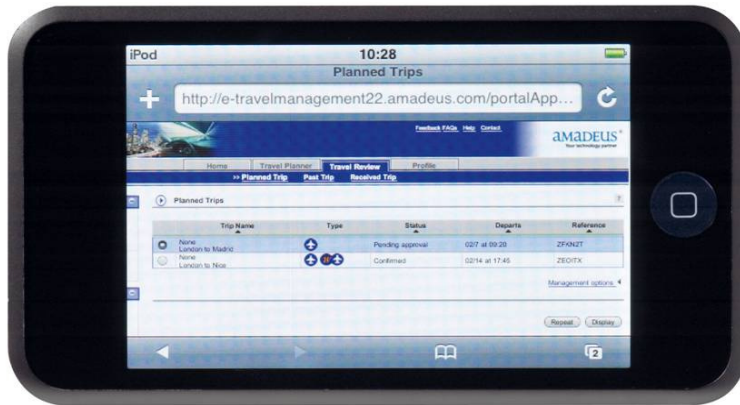

**Book a new trip with  
Amadeus Single View on iPhone**

# Approve trips while on the move

Don't let technology hold you down.  
With Amadeus e-Travel Management you can approve or reject trips while away from your office through your handheld device
