

Amadeus e-Travel Management

Profile Management

Sales & e-Commerce

Profile Management is the key to efficient profile synchronization within Amadeus e-Travel Management. Now you can manage all your profiles at once while avoiding duplicated data, slow implementation and lack of flexibility. Synchronized profiles means no more errors when making manual updates to employee profile data stored in different locations. With Profile Management you not only reduce your error margin but save time and cost.

”
With Profilelink, the tool for profile management, we could integrate seamlessly the user data from our existing workflow and travel expense management system to e-Travel Management and hence avoid additional workload.

Massive data uploads - fast and reliable

You are uploading and storing profiles in more than one location and want to do it in one batch. How often have you wished for a faster solution? With Profile Management you can now add any amount of new profile data to your existing files easily and efficiently. Linked databases translate into a greatly simplified and speedy process. Entering the same data over and over again is a waste of your staff's time and inaccuracies are bound to slip in.

Complete synchronization

Imagine having to enter data only once - right from your own in-house corporate HR applications, with profiles stored in various locations updated simultaneously! Profile Management gives you up-to-date information across all databases and applications with no room for error and immediate access to all your employee profiles. Profile Management is compatible with all types of profile standards used in the different markets and lets you easily roll out a customized, unique format to sister companies, subsidiaries and/or content providers of your choice.
