

Did you know...

...Amadeus e-Travel Management is compatible with all major web browsers?

Our solutions are developed in accordance with industry compatibility standards ensuring that our browser-based self-booking tool, Amadeus e-Travel Management runs perfectly on the main Internet browsers.

Internet Browser Market Share

Source: Net Applications, 23rd October 2008

Amadeus e-Travel Management is officially supported on:

- Internet Explorer V5.5 and above
- Mozilla Firefox V1.5 and above
- Safari 1.2.4 (v125.11), 1.2.3 (v125.9) and 2.0

As well as supporting the above, Amadeus e-Travel Management also functions on Opera and Google Chrome making it compatible with the vast majority of browsers on the market.

For officially supported browsers, we ensure through full test campaigns that we are up-to-date with the latest versions as they are released into the market. In fact, today we are 100% compatible with the new Firefox 3 and are currently working on the soon-to-come Internet Explorer 8.

At the same time, as the rollout of new browser versions can sometimes take time within the corporate environment, we also guarantee that Amadeus e-Travel Management will maintain its compatibility with older versions.
