

Amadeus Systems Integration For Corporations

Services & Consulting

In today's complex world, making different IT systems converge seamlessly can be a challenging business and integrating travel technology into your existing infrastructure is no exception.

With Amadeus Systems Integration, you get the support you need to integrate Amadeus e-Travel Management with your existing corporate IT environment – with applications such as HR and expense management systems as well as corporate intranets and your travel management company's back office systems.

Integration with your existing IT environment made easy

'What' and 'when' is up to you. Amadeus e-Travel Management is a flexible and scalable solution meaning you choose the level of integration you need depending on your technical expertise. You will appreciate our wide choice of entry points – using XML over HTTP and SOAP – enabling the seamless connection with any ERP system and your own in-house IT platform and minimizing the implementation time. Amadeus e-travel Management lets you manage your corporate travel at your own pace and through one easy-to-use interface.

...and your company saves money

But what if cost really is the bottom line? By simplifying the integration process, Amadeus leverages your existing corporate IT investment leading to savings of up to 10% of your total travel spend.

One continuous workflow means rapid adoption of your travel booking solution by your travellers. Your ROI is maximised and your employees have plenty of time to do what matters most – **getting on with their business.**

Did you know that 70%* of self-booking tools are operated independently of other corporate IT systems? The scope for Integration is tremendous and a better user experience for employees leads to higher corporate productivity.

One continuous workflow means travellers save time...

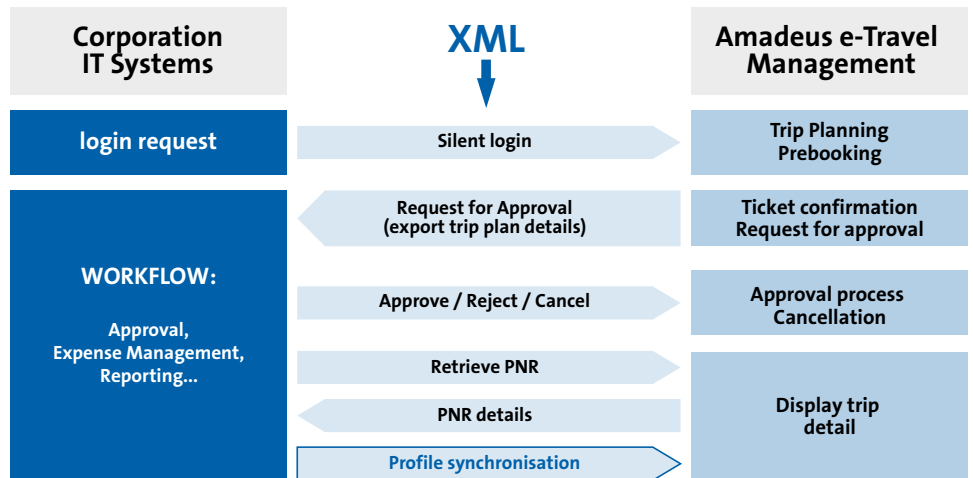

From booking to expense reporting, our expertise will support your integration project providing automatic workflow and improving travel request efficiency. Once your expense system is integrated, **your traveller** finds his expense claim is pre-filled thus saving time.

Travel approvers can save time too. It takes just one click to approve or reject an employee's trip request. Nothing could be quicker... or easier!

The Administrator saves time as well. Traveller profiles are created online in Amadeus e-Travel Management once and then replicated to the travel management database. Furthermore, from your web portal, for example your intranet, travellers and travel arrangers can connect to Amadeus e-Travel Management seamlessly via Silent Login.

Integration Workflow Model

Key Features	Benefits
Profile synchronisation	<ul style="list-style-type: none"> > All information is centralised in one database with no need to maintain several profile databases. > Data is updated accurately via a single administration point.
Silent login	<ul style="list-style-type: none"> > Single Sign On means no time is wasted: employees log into their corporate IT system and their self-booking tool at the same time. > Employees work with one single application.
Integration with company's expense or HR systems	<ul style="list-style-type: none"> > Confirmed business travel bookings are automatically entered into the company expense reporting system. > Accuracy is ensured due to automated data transfer.
External approval workflow	<ul style="list-style-type: none"> > Reservations are automatically sent to the company's approval system. > The system can automatically reject a booking request if the price is above budget giving more control to the travel manager.
External cancellation	<ul style="list-style-type: none"> > Bookings can be cancelled via an external application without having to manually log in to Amadeus e-Travel Management.
