

Amadeus e-Travel Management Product Spotlight

Corporations

This document is aimed at highlighting our top new features for **Amadeus e-Travel management v10.1**

The document can be used for external communication with your customers.

> our top new features

February 2007 edition

Our top new features:

- > Make multiple bookings in one reservation on SNCF, Thalys and Eurostar.
- > View all trips waiting for approval on one screen.
- > Understand your traveller behaviour.

Make multiple bookings in one reservation on SNCF, Thalys and Eurostar.

Now your travellers can be seated together and have access to some of the newest and latest fares available on sncf.com (Prem's). It also improves the automation of the fulfilment process to obtain touchless PNRs.

Traveller 1

Itinerary	Fare Type	Date	Time

In multi-passenger reservations, different fares types may apply for each traveller, depending on their SNCF subscription cards

View all trips waiting for approval on one screen.

It allows the travel arranger to view all trips due for approval or pending on one screen giving them more flexibility and ease of use.

Arranged Trips

On this page you can search and select trips that you have arranged for other travellers or create a new trip for another traveller.

[Book a trip for another traveller](#)

Urube	Urube	8545 235 785	London to Tokyo	12/6 at 6:45 AM	Community B	Confirmed YHQ452

Travel Review Arranged Trips – where to select a trip to display

Speed up your approval process.

While travelling, travel approvers can approve trips, from a Blackberry, for a quicker approval process.

View flight options from and to your final destination from 2 or more airports when located within a close radius.

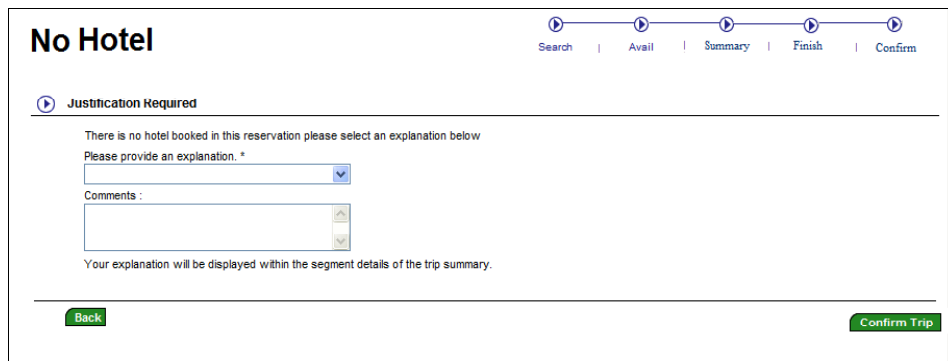

For example if you travel to Edinburgh, you can see flights to this city but also to Glasgow which is located nearby, giving full flexibility and greater choice of travel options. It further improves your search power by integrating all content into one screen.

Travel Review Arranged Trips – where to select a trip to display

Understand your traveller behaviour.

You can now activate the option prompting travellers to justify why no hotel has been booked. It increases knowledge of your travellers' behaviour as well as helping you monitor booking behaviour outside of the tool.

Confirmation page – writing explanation for not booking the hotel

Amadeus e-Travel Management compliant with:

PC, MAC and now Linux, moving to open source technology.

Our product vision:

Over the next three years, Amadeus will provide a unique approach to Corporate Travel. The Online Booking Tool will evolve beyond Trip booking to a complete Traveller Care experience. In the forthcoming releases we are taking our first steps towards this approach revising the travel planning experience completely, optimizing the faring process to propose the best possible trip alternatives.

A **new Air & Rail Agent** will be introduced enabling travellers to combine different types of travel with different faring restrictions, all within a unique display and always in accordance to the corporation's travel policy.
