Altéa Airport **Link** in a nutshell

- ▶ Service provided through a unified end-to-end private IP network, to allow Airlines and Ground Handlers at airports access:
 - (1) **to the Amadeus Altéa central services** (e.g. DCS) together with,
 - (2) **from customers' and shared airport (CUTE) device**

What are the current challenges when connecting

- ▶ **Efficient connection** of Airport applications to computer center (or application provider computer center)
- ▶ **Cost** reduction of connection
- ▶ Increase of **reliability**
- ▶ Replacement of legacy protocols by **state-of-the art IP network**
- ▶ **End-to-end support** and increased service level
- ▶ **Solution scalability**
- ▶ **Web Browser** compliant network
