Amadeus Ticket Changer

Amadeus Ticket Changer is the Amadeus solution to automate the calculations necessary to reissue a ticket and to store the results in the correct ticketing formats ready for the travel documents issuance. Ticket Changer is capable in one entry of computing the fare and tax differentials, the penalties and any residual values.

A complete solution in 4 simple steps:

- > Retrieval of existing bookings.
- > Rebooking: new itinerary, class, flight, dates...
- > Pricing: price difference, penalty, tax...
- > Document preparation and issuance.

Amadeus Rail Plus

Amadeus Rail Plus is the brand new intuitive rail application designed by Amadeus: easy to use and quick to book, Amadeus Rail Plus will help you offer more flexibility and choice.

- > A Rail booking solution fully integrated in Amadeus Selling Platform.
- > Powerful search, faring comparison, quick sell and ticketing functions are available from one single interface to accelerate the entire booking process.
- > All details of the trip will be saved in the Passenger Name Record (PNR) and a full itinerary can be presented to the traveller immediately.

Powered Queues

You can now experience the newly re-designed Amadeus Queues, essential for the management of communication and booking between providers, branches and Amadeus.

You can preview each PNR in a given queue, resize the individual windows within the queue page and sort each column by preferred criteria. All queues are also listed on the left-hand side of the screen, providing an at-a-glance overview of all queues.

A pop-up calendar allows you to easily change the queue display date. These new features offer a clearer and more intuitive view.

Working in a more streamlined and proactive way within the graphic queues area is another step towards increased productivity and impressing your customers.
