

Amadeus Selling Platform

Amadeus All Fares

Sales & e-Commerce

Travel agents today need to be able to offer choice & flexibility to their customers in order to best match their needs and preferences. As travellers use more & more the internet to compare prices and journeys, and corporations focus on streamlining their costs, accessing multiple content sources and comparing prices in an instant becomes a must for all travel agents.

Search & compare all fares with Amadeus!

A powerful and intuitive low-fare search engine, Amadeus All Fares ensures travel agents can quickly & easily find the best deal for their customers.

More choice & flexibility

Amadeus All Fares is the shopping and comparison solution fully integrated at the point of sale in Amadeus Selling Platform. Agents benefit from a huge choice of fares and unique search criteria ensuring they can offer the choice and flexibility that their customers are looking for, at the best price.

Agents can now search low fares from both Amadeus and non-Amadeus sources. Results are displayed in one single screen helping the agent to easily compare the different deals.

Several hundred flight recommendations can be returned with each search, and a calendar view ensures even more choice for those travellers who have flexible dates.

Agents can even further enhance the customer service that they offer by making use of the powerful filter criteria within All Fares – for example, searching within a defined ‘radius’ around a city/airport, selecting alternate airports and alternate dates.

Agencies with both online and offline sales channels can offer their customers the same search functionalities and consistent content.

Faster sales process

Time-consuming searches across multiple websites or applications are no longer needed. Agents can now make use of the intuitive single screen search to request content from different sources. Amadeus All Fares also manages automatic log-in to business websites from where agents can instantly access the best negotiated fares.

Results are returned within seconds and via a single request, thus avoiding multiple costly searches. Amadeus GDS content can be booked straight away and the PNR is automatically updated. All billing information is seamlessly transferred to the mid and back office.

Details are displayed in one easy-to-read screen, saving the agent precious time during the sales process. Rules, fees and conditions of all fares, irrespective of their source, are displayed instantly and flight availability is checked up-front.

Comparison between the different options is made easy with All Fares. An agent can quickly propose the best deal for the customer and, when integrated into Service Fee Manager, ensure the most profitable fare for the agency.

Search & Compare multiple content in one single display:

- > Public fares
- > Private fares
- > Low cost carriers
- > Consolidators*
- > Corporate B2B website fares...

* market specific
