

Designed for customers who have an in-house fare database or who are working on a third party fare database, Amadeus XML Fare Data Interface is the Amadeus solution for mass uploading all your private fares automatically into the Amadeus system.

With this product, you will:

- > Keep filing your fares into your own database
- > Synchronize your local database with the Amadeus system
- > Make your local fares price-able in Amadeus Fare Search products, and by authorized vendors

Get the best of both worlds!

Keep your own local fare management system & benefit from Amadeus global reach and fare processing, without double filing!

Your own local fare management system...

Manage your fares in-house

- > Maintain your local fare filing tool and database that have been tailored to your needs
- > Control your contracts locally and decide on the ones you wish to publish in Amadeus

Automate the fare uploads in Amadeus using recognized standards

- > Secure your fares in Amadeus without any manual intervention
- > Build your converter in the widely used and recognized XML language
- > Translate your data into the Amadeus fares format in line with industry standards

...with Amadeus global reach and fare processing!

Benefit from Amadeus shopping products and pricing functionalities

- > Use the powerful Amadeus shopping products in your offices and website
- > Have your local private fares merged seamlessly with public and corporate fares in Amadeus display and pricing requests -benefit from automated pricing and ticketing

Increase your market reach

- > Specify your distribution network using standard identification codes or vendor aggregates and make your fares available - with your authorization - to any website, call center, ATO/CTO or Amadeus agent around the world
