

In the online world, constant improvement is not merely an aim, it is a must. Amadeus Web Services with its **latest generation technology** offers you unparalleled connectivity from a single point of access to all of Amadeus' comprehensive content. **With its state-of-the-art Open System architecture** and XML formatting, Amadeus Web Services offers you an economical way to build and update your own customised travel booking applications. And best of all, it's easy to implement and integrate with existing systems. With Amadeus Web Services, you will always be at the **cutting-edge of architecture and technology**.

Open technology for an effortless implementation

Implementation of new systems can be slow and difficult, but with Amadeus Web Services you can relax. Amadeus Web Services is entirely platform-neutral and is totally independent of both language and application framework, making implementation quick and efficient. You will be able to combine the powerful and reliable source of information provided by Amadeus with your own business logic and will save time by avoiding the necessity of accessing various environments. In addition, Amadeus Web Services has the most comprehensive documentation and automatic code generation in the market, which drastically reduces implementation time.

Amadeus customers who have already selected this solution benefit from access to the entire range of 150 Amadeus web services, including some of our key online innovations such as:

- > Amadeus Master Pricer Standard
- > Amadeus Master Pricer Calendar
- > Amadeus Master Pricer MySearch
- > Amadeus Sell By Fare
- > Amadeus Check My Trip

A long term vision for your technology investments

The cost of implementation and development of new products and functionalities in existing or new systems can be prohibitive, especially in the technology sector, where to succeed you have to be at the cutting edge. The flexible integration of Amadeus Web Services into your systems means that you can now invest with confidence in new software and development languages.

Amadeus Web Services has been designed to give you maximum flexibility at minimum cost, both now and in the future. With Amadeus Web Services, you will no longer be locked into expensive application systems, your choices will no longer be hampered by your existing platform and language. Instead, you will be free to use the most innovative and cost-effective technology in the market at next to no development and maintenance costs. Being at the cutting edge has never been so easy!

State-of-the art technology

The entire industry is shifting towards a more service-oriented architecture which permits incorporation of Web 2.0 developments. Amadeus Web Services is scalable and totally Web 2.0 compliant, allowing you to deploy these new features to their fullest advantage and integrate future improvements quickly and easily. If excessive server downtime is one of your

Server uptime

High-tech, uninterrupted service to a wealth of information.

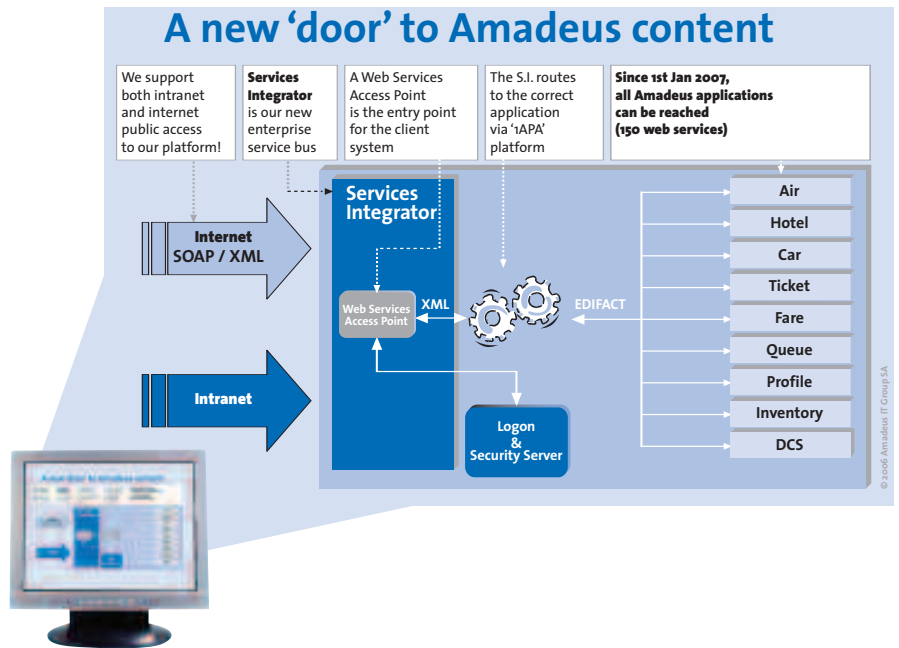

More than 99.5% guaranteed server accessibility

main concerns, Amadeus Web Services is the solution for you as it conforms to Amadeus' rigorous quality standards and benefits from the highest server up-time guarantees in the market.

Count on us 24/7

Our Amadeus Support and Certification team is unrivalled. Nine years of hands-on experience validates our claim. With Amadeus Customer Care Services, you can rest assured that each time you call you will be talking to a panel of experts with both in-depth technical knowledge and an all-encompassing overview of the flow of work in an online travel agency.

Our Global Support System is available 24/7 and applies the highest standards of support and care, providing customised assistance and streamlined solutions, which maximise efficiency rather than patch existing systems.
