

Rev up your business

Increase productivity

Improve the speed and volume of your rental car booking activity with Amadeus Cars.

Put real-time, reliable information at your agents' fingertips. And give them fully integrated technology to enable them to perform search, booking and sales processes even faster for improved productivity and operational efficiency.

Agents can quickly and easily search, compare and book cars from multiple providers; and air segment locations/dates are automatically carried over to the car search. Plus, everyone can benefit from seamless PNR integration/validation and the same quick and flexible paperless e-voucher solution that has so far been exclusive to airlines.

Agency management also benefits from automatic invoicing, service fee calculation and reporting, as well as the automated generation and storage of all multiple source trip information.

Optimise revenues

Use Amadeus Cars to sell proactively and benefit from bigger and more profitable car rental business.

Full integration with all front and back office systems and the comprehensive content available via the Amadeus Selling Platform gives you access to immediate and clear cross- and upselling opportunities. Plus you can make up to 15% commission per booking with Amadeus Cars.

Amadeus Service Fee Manager enables you to improve revenue management, and there are also automated processes to streamline all your payment and collection processes.

Increase choice

Offer a comprehensive choice of content and great rates to impress your customers.

Amadeus Cars gives your agents instant access to extensive content from 25 car rental providers across 36,000 locations in 250 destinations around the world. It also gives them – and your customers – access to local car rental companies and brokers that are not available in any other GDS.

Agents can search, compare and book cars in no time at all, having viewed multiple vehicle offers on one screen. And they have easy access to just as wide a selection of negotiated rates, prepaid leisure rates and public rates.

Personalise service

Use Amadeus Cars to offer an impressive level of personalised customer service that most direct providers just can't match.

Corporate and individual customer profiles can be quickly, easily and securely stored in the Amadeus system for instant accessibility and reference, and car availability displays can then be populated according to specific customer preferences and corporate travel policies.

You can also offer detailed information for customers both pre- and post-booking. Once a booking has been made, customers can use the secure, personalised Check My Trip portal to display, download or email their complete travel itinerary, including comprehensive car rental information, to key contacts.

Shift up a gear with Amadeus Cars

Amadeus Cars is the key to building your business quickly and easily. It enables you to increase both the speed and the volume of your rental car booking activity for improved productivity and optimal revenue generation.

With Amadeus Cars, your agents can add to your existing travel booking business by quickly and easily accessing the widest choice of cars content offered by any GDS and supplying customers with detailed booking information that will set your service apart from your competitors.

They can also perform those search, booking and sales processes faster, thanks to instant integration with all other Amadeus solutions from front to back office.

As well as increasing overall productivity, Amadeus Cars also provides plenty of opportunities to streamline sales and optimise revenues for improved profitability.

Your customers will love it too. Because it enables you to offer more than direct providers and deliver an impressive level of personalised service that won't be forgotten.

Quite simply, Amadeus provides the best integrated cars booking suite on the market. So if you want to boost your car rental business, you need Amadeus Cars.
