

Get ready for a platform that will provide your business the stable, flexible support it needs to grow. Global MAX® is a powerful information management solution from Amadeus, your technology partner, designed with larger travel agencies and cruise companies in mind. It's flexible, customizable and, simply, the industry's leading information management system.

Are you doing business worldwide? Global MAX provides multi-currency and taxation processing to streamline exchange processes. You can count on Global MAX to handle your every accounting and financial reporting need, so you can concentrate on the things that really matter—serving your clients.

Global MAX continues to provide us with a viable back-office solution to accommodate our sustained growth. The staff on the Global MAX customer support desk is always available to assist us by going the extra mile. It is a pleasure to work with them.

Dennis M. Hopper
CTC Director, Travel Agency Services
AAA Southern New England

Global MAX has proven to be a very effective and flexible system for TQ3Navigant. With our acquisition of SATO, we'll realize cost savings and productivity improvements by implementing Global MAX for that division's operations. This is a robust system that meets our expectations for handling large-scale enterprise applications.

John S. Coffman
Chief Accounting Officer
Navigant International

Your Financial Partner

Global MAX is positioned to be your business and financial partner. With the ability to receive interface records from any GDS, running independently or simultaneously, Global MAX will save you time, money and business management headaches. Global MAX can help to reduce your up-front cost of sales with a voucher-based accounts payable system that confirms customer payment receipt before issuing related vendor payments. With Global MAX's accounts receivable module, you'll easily track receivables on a branch level, allowing you to better manage and report your financial position.

The system also offers a money-saving transaction fee capture feature that enables you to act as your own credit card merchant. You can capture, track, store and report on your collected transaction fees. Global MAX helps take the guesswork out of financial reporting, giving you a clear picture of where your company stands.

Trustworthy Management

The first order of business in any transaction is trust. Global MAX puts unrivaled quality control at your fingertips. It validates all data at ticket-issuance—comparing its elements to entries in your customer master files—and cleans up data errors. Global MAX also performs regular system validations using sophisticated conditional logic and look-up tables in order to provide an accurate representation of your data and income.

With Global MAX, you can produce more detailed commission reports, match commissions to original sales, and produce automated, reminder invoices to suppliers for the unpaid amounts. You'll reduce the time your team members spend on accounting and collections while obtaining accurate, dependable financial information. Global MAX is business management made easy.

The Power of Flexibility

The ability to grow your business depends greatly on the agility of your support systems. Global MAX provides your company the flexibility it needs. The system can support up to 35 individual companies, each of which can be defined with unlimited customers and travel providers.

Each company can also store thousands of branches and agent numbers. Global MAX supports dual currency displays and processing features based on the options selected within the customer and vendor profiles, allowing you to provide pertinent information and exchanges, regardless of location.

The Global MAX General Ledger provides you with easy-to-use, spreadsheet-style budgeting and statistical reports, which can track up to six fiscal periods at one time.

File Maintenance tasks, such as adding new industry participants, are simple with easy-to-edit, customizable vendor information files.

Global MAX raises the bar in the industry with its unique blend of stability, scalability, quality control and flexibility. No other back-office solution offers you this kind of functionality on a platform you can rely on. It's time you take your business to new heights. Global MAX can take you there.

Global MAX Benefits:

- > Flexible GDS Interface - Receive interface records from any GDS interface program, running independently or simultaneously.
- > Easy File Maintenance - Keep information up-to-date, such as industry codes and add new industry participants, quickly and easily, according to your specific requirements.
- > Convenient Database Storage - Store virtually unlimited amounts of data, capped only by user-defined hardware specifications.
- > Superior Quality Control - Confirm information entered at ticket-issuance for improved accuracy.
- > Accurate Commissions Reports - Validate car and hotel data to obtain a more detailed picture of your income and commissions.
- > Hassle-Free Transacting - Support dual currency and taxation processing to better serve your overseas customers.
- > Seamless Automation - Produce automated reminder invoices to suppliers for unpaid commission amounts to reduce collections.
- > Customized General Ledger - Define your account structure to fit your needs.
- > Profitable Transaction Fees - Be your own credit card merchant and increase your bottom line.
