

# Amadeus for Corporations

*Connected* business travel

Technology is rapidly expanding possibilities in global travel. Tech-savvy business travellers are demanding more connected travel experience.

You need a travel IT partner who can lead you deliver a complete travel management solution; an efficient, seamless, end-to-end way to control costs **and** empower business travellers.

## The way we work is different

No other technology provider has such a diverse and deep footprint in the travel industry. The solutions we build are integrated into the world's global travel ecosystem meaning easy synergies and seamless connection.

Our close collaboration with travel providers, travel sellers and travel buyers energise and empower travel businesses, helping them deliver smooth, efficient experiences for travellers.

And wherever you are, we are there too. With more than 12,000 staff, from 117 nationalities, creating a local presence in 200 markets, Amadeus is your truly global business travel partner.

## What we offer is different

Implement an Amadeus solution and you do much more than buy a travel tool; you **connect** to a global community offering the richest, newest bookable travel content.

Our unique community platform, Altéa, was built for airlines. Today more than 130 of them use it, and you can too. With Altéa you see what they see – and you can **serve** your business travellers better.

Our travel management solutions let you **manage** all aspects of your travel programme, from end to end, so that every trip is policy-compliant and cost-controlled. And only Amadeus can be seamlessly integrated with 3rd parties finance, HR and travel management infrastructure and workflows, creating streamlined, efficient processes that join-up every phase.

## The way we see the future is different

A substantial, sustained commitment to Research & Development (R&D) has made us Europe's third largest investor in software services innovation. Our developers are working permanently to create technology that will help shape the future of business travel.

Our advanced, open-systems architecture makes it easier to develop, customise and integrate new content and applications. Our corporate travel IT system is among the most flexible ever designed, with modular, plug-and-play integration of meeting management, calendar integration, expense management, video conferencing, in-trip traveller services and much more.

Our multi-platform approach makes everything accessible on any device; enabling you to support your travellers' needs, wherever they are.

## Empower the traveller. Empower the business.

### Connect

Amadeus opens up a world of self-bookable travel content to your travellers.

Direct, round-the-clock access to our booking system lets them compare and book 95% of the world's scheduled airline seats, with guaranteed last-minute availability, real-time choices and seamless connection to airline loyalty programmes.

Then they can search, compare and book their onward travel, by train or rental car, or an overnight stay in one of 300,000 hotel properties.

Our mobile services put all this at their fingertips, 24/7.

### Serve

Our corporate self-booking solutions empower and liberate your travellers with the best travel content but in an integrated, policy-compliant environment.

State-of-the-art mobile services let you support them on the move with a full suite of personalised travel services, contextualised to meet their changing needs and delivered to their device of choice.

Our multi-channel commitment makes sure everything is available through a single, familiar application, whatever their device, wherever they are.

### Manage

Our Corporate Travel & Expense solutions help you take control of your whole corporate travel programme.

By simplifying and optimising your end-to-end travel processes you can maximise the benefits of better cost control and make life easier for your travellers.

The convenience of our integrated systems encourages travellers to want to use them, helping to maximise a host of other business benefits, including improved travel budgeting, speedier expenses reconciliation and reimbursement, sharper reporting, and improved legal and corporate tax compliance.
